## [Inventory Overstock Clearance!!](#)

Over the years Integrated Control Solutions (ICS) has kept many commonly requested items on site at its US location in order to be able to quickly respond to client's needs. Over time this has resulted in an accumulation of new items in excess of what is needed to be kept on hand. Many of these items are in their original packaging while some were "binned" so we could easily pick and send out the exact quantities that our clients requested. All of these items are new. We have significantly lowered the prices on all of these items in order to reduce the on shelf inventory. These prices are for "in stock" items only. These will be distributed on a first requested first served basis until the stock is depleted so act quickly! Once the in stock items run out these prices will be gone but we will still be able to provide them on request at our regular low pricing!

## Application Example

### **Seal Location Inspection**

Detects the white colored seal on the aluminum foil. The reflective index of both the foil and the white seal is quite large so discrimination is difficult. By placing the sensor at an angle the light reflected from the seal is at a wide angle.

#### **Detection Subject: Seal**

Separate Amp Photoelectric Switch E3C-VS7R

Amp Unit

E3C-JC4P
