

Transportation and others

36 Screw Tightness Detection

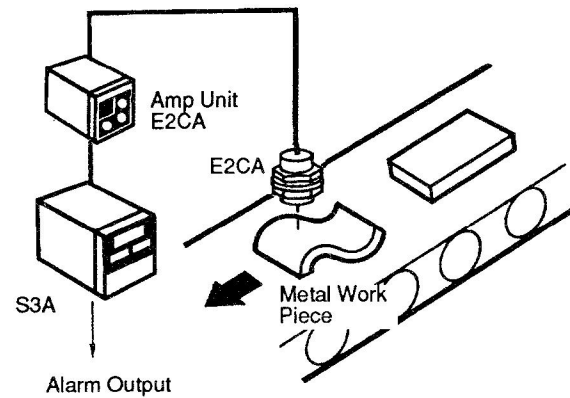

A linear proximity sensor is used to detect screw looseness.

Linear Proximity Switch E2CA

37 Work Shape Abnormality Detection

A linear proximity sensor detects abnormal shapes.

Linear Proximity Switch E2CA

38 Bar Stock Diameter Measurement

The diameter of bar stock is measured with a laser variation meter as it passes on the conveyor.

Detection Subject: Bar Stock
Laser Variation Meter 3Z4M

39 Work Warpage Detection

Use the input from the remotely set S3A2, two variation sensors measure the work. The displayed DEV value is used to detect warpage.

Detection Subject: Work
Laser Variation Sensor 3Z4M
Linear Sensor Controller S3A2

40 Pin Detection

A spot lens is attached to the fiber sensor and SUS pins with a diameter of 1.0 mm can be detected. The lens and fiber sensor can be used in very small spaces.

Detection Subject: SUS pin
Fiber Unit E32-D32
Micro-spot Lens E39-F3A
Amp Unit E3XR-CE4

41 Lead Detection

Using a laser variation meter lead wires (coil 0.3 mm) that can not be detected by photoelectric means are able to be accurately detected and positioned.

Detection Subject: Lead Wire
Laser Variation Sensor 3Z4M
